Tecnólogo em Sistemas para Internet

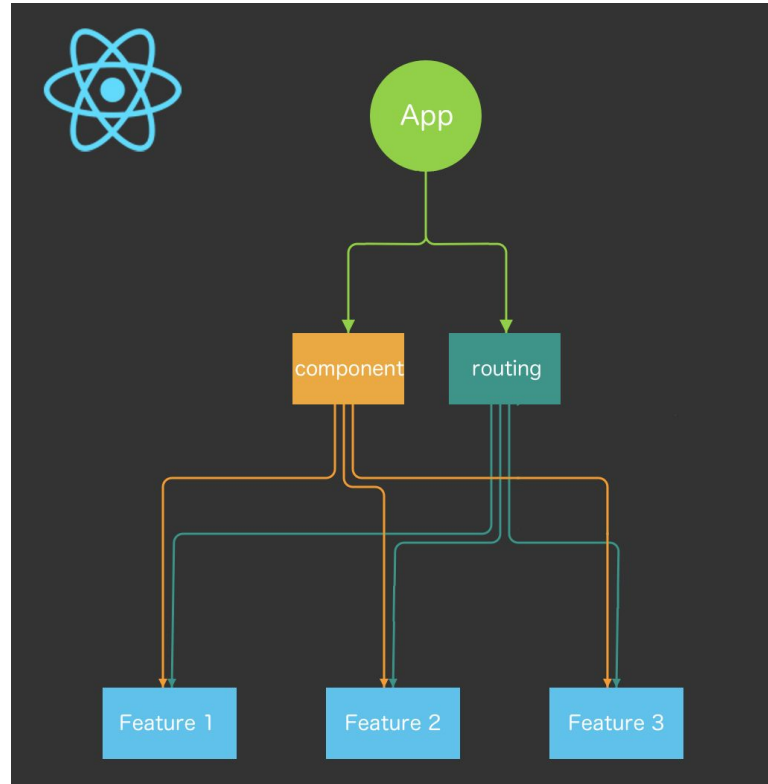

Aula 07: Construindo uma página principal com
integração de um chat

O que vamos construir?

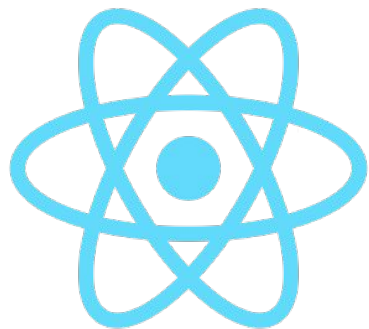

React

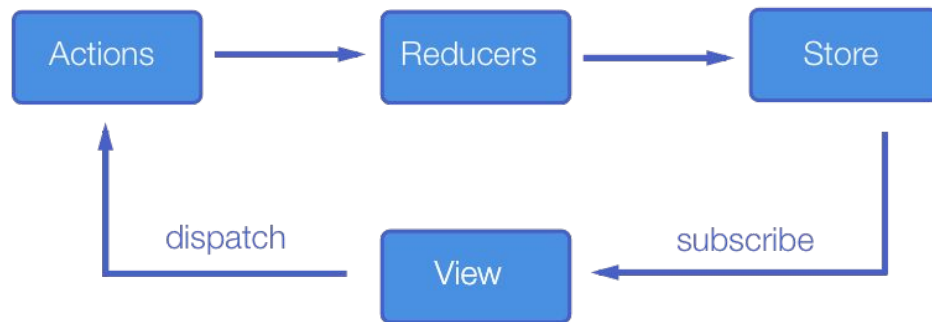

<https://reactjs.org/>

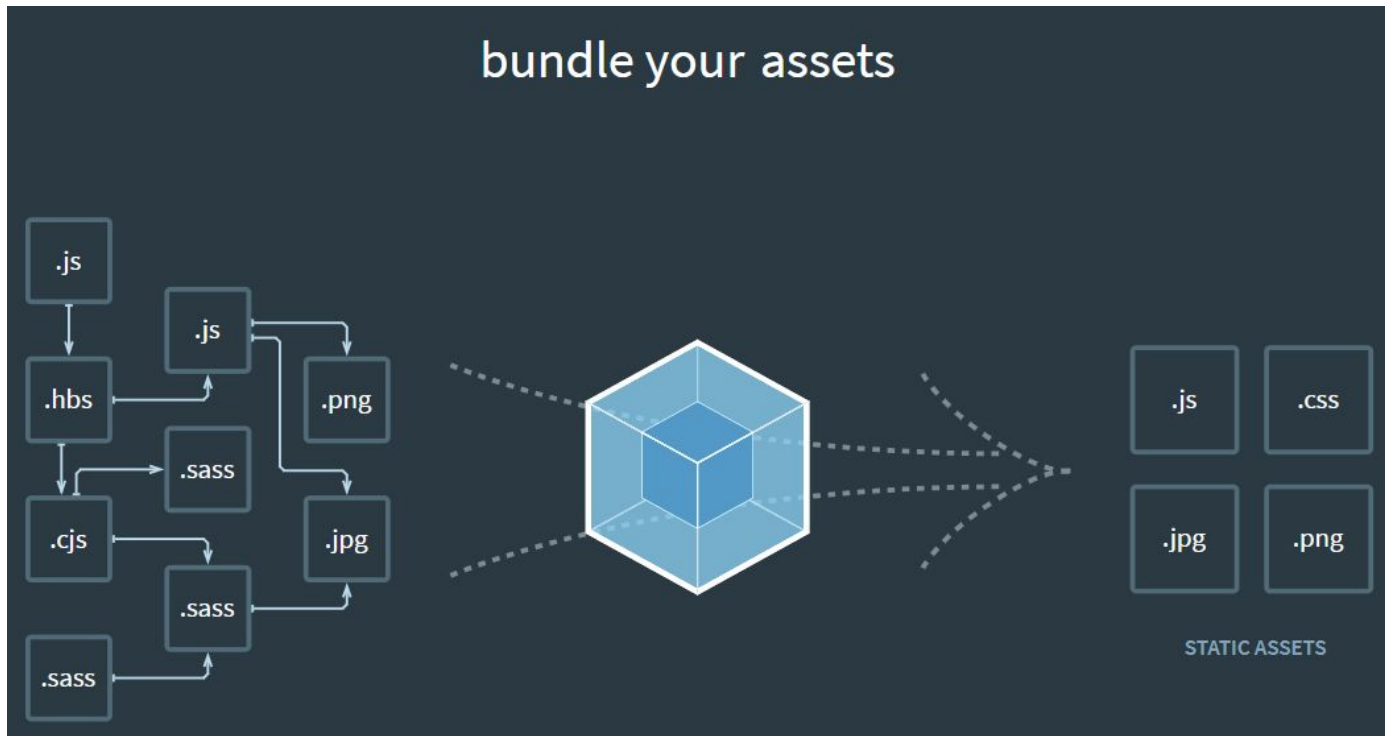

React + Redux

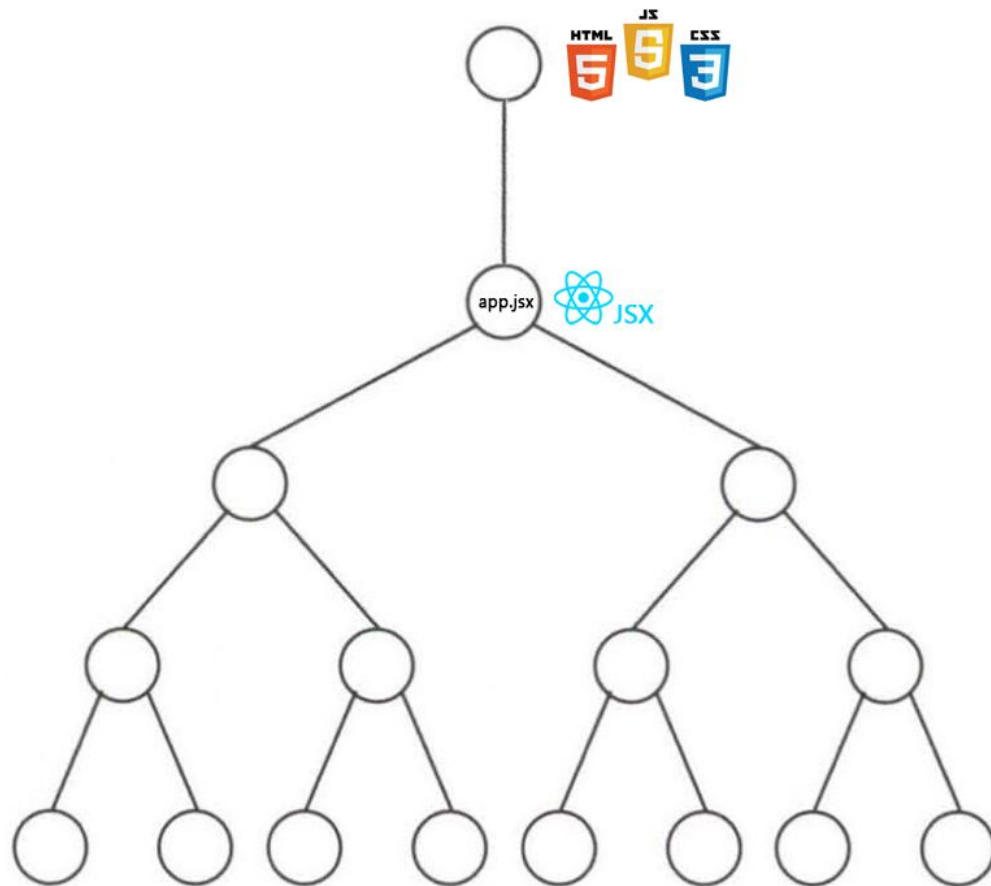

Redux

Webpack

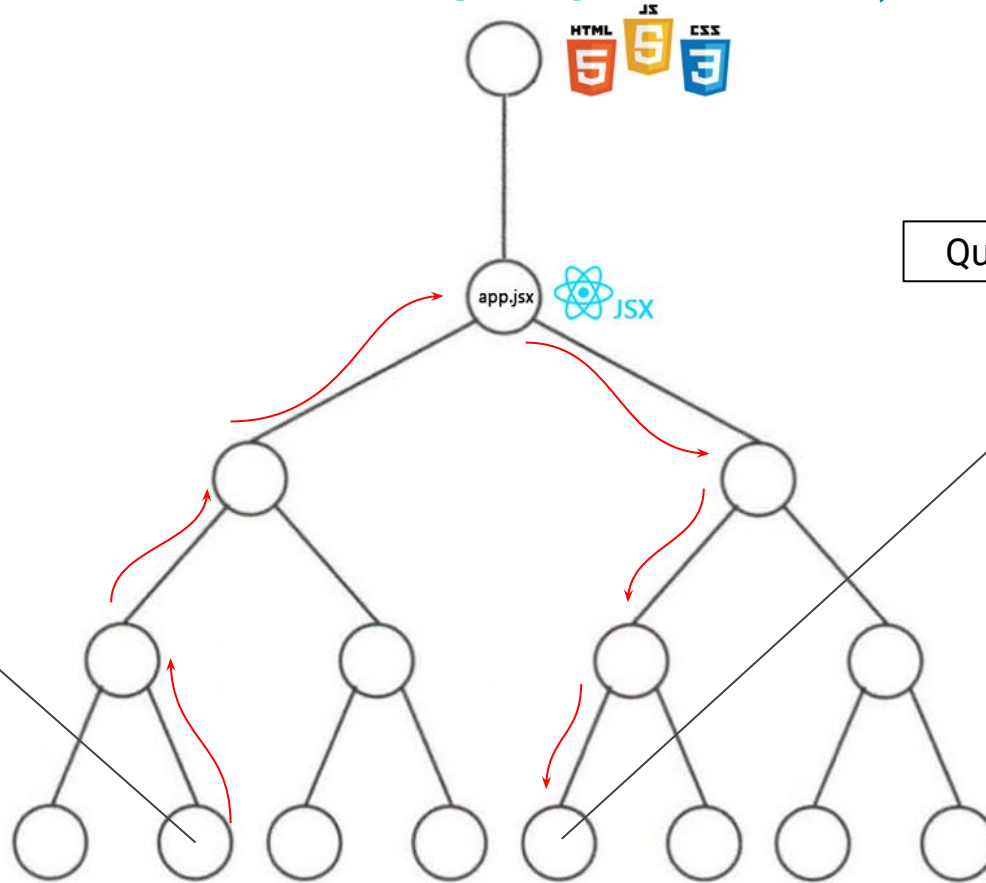

React

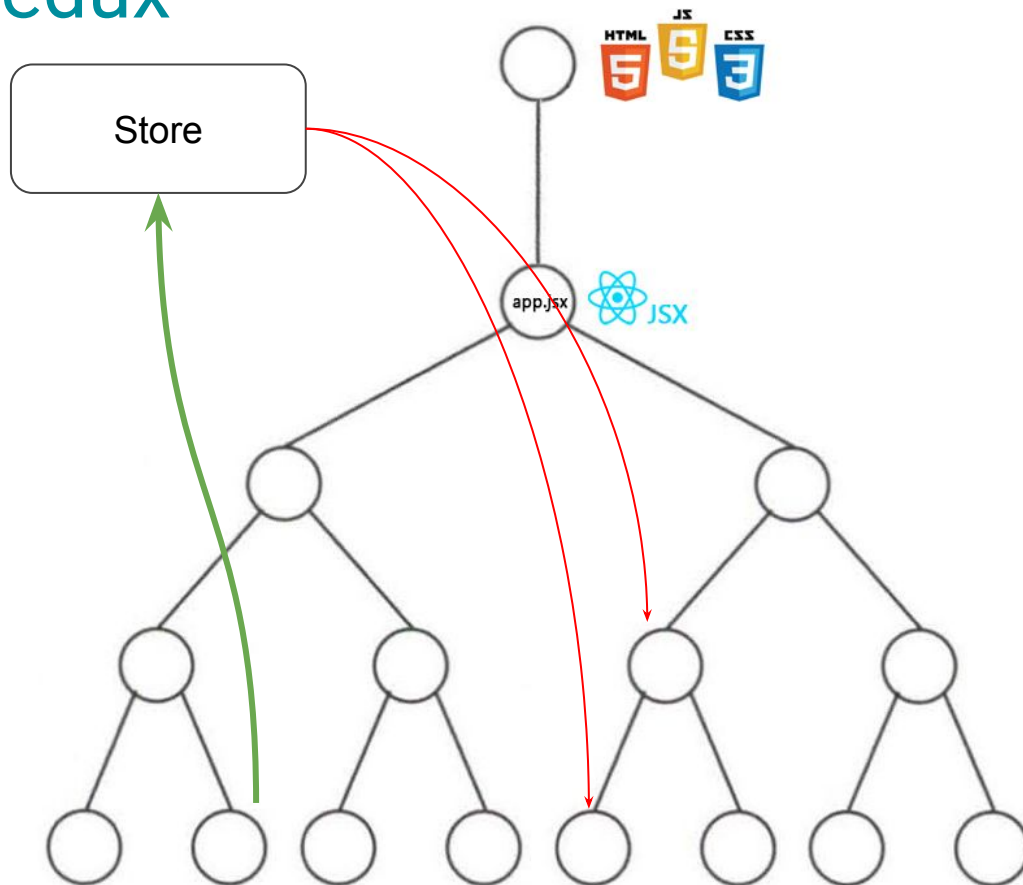

React (recebendo uma propriedade)

Tabela B		
Indivíduo	X: Massa corporal (kg)	Y: Consumo anual de água (L)
1	90	850
2	120	400
3	60	300
4	40	550
5	82	490
6	90	350

Quantidade de indivíduos: 6

React + Redux

Iniciando a aplicação

Iniciando a aplicação

- Criar um projeto no Github;
- Clonar o projeto;
- Abrir o projeto utilizando uma IDE de desenvolvimento;
- Inicializar o projeto usando um template;

React (inicializando projeto)

```
$ npm install -g project_template_generator@latest
```

```
$ generate
```

https://github.com/jpdik/project_template_generator
